[LeetCode: emad200105](#) | [Google Scholar](#) | [Portfolio](#)

Skills

Languages: C, C++, Java, JS, HTML, CSS, PHP, MySQL, React, Python

Tools: Microsoft Office Suite, Google Workplace, Jira, VS Code, Jupyter Notebook, Postman

Version Control: Git, GitHub

Networking: Understanding of routing, switching, load balancing and network protocols (TCP/IP, DNS, DHCP, etc.)

Database Management: MySQL, PostgreSQL

OS & Systems: Linux(Ubuntu), Windows

Work Experience

United International University, Dhaka

Mar 2026 - May 2026

Undergraduate Teaching Assistant

- Mentored over 35 undergraduate students in core computer science concepts, providing one-on-one debugging assistance and code review during weekly office hours.
- Evaluated and graded assignments, lab reports, and examinations, ensuring timely and constructive feedback to improve student comprehension and performance.

Education

United International University

Mar 2022 - Jun 2026

B.Sc. in Computer Science and Engineering

CGPA: 3.90/4.00

Relevant Coursework: Object Oriented Programming, Database Management, Discrete Math, Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning, Data Mining, Advanced Data Structures and Algorithms, Image Processing

Project Work

- **Document Dewarping using U-Net (Python, Keras, OpenCV):** Developed and trained a deep learning model to correct warped and wrinkled scanned documents, improving readability and structural accuracy using computer vision techniques.
- **Traditional Bangladeshi Food Detection (Python, YOLOv8, OpenCV):** Built an object detection model trained on a custom dataset featuring 19 Bangladeshi food classes, successfully detecting items like kacchi, peyaju, cha, and tiler khaja.
- **Bangla Handwritten Text OCR (Python, Keras, Deep Learning):** Engineered an OCR system using CNN architectures (ResNet and EfficientNet) for feature extraction and classification to recognize handwritten Bangla characters.
- **Career Prediction System (Python, Scikit-learn, Pandas):** Built a prediction model utilizing Logistic Regression to forecast career paths based on academic data, achieving an 89% prediction accuracy.
- **CampusLynk (PHP, MySQL, JavaScript):** Developed a full-featured university management platform featuring resource management, a routine planner, counseling tools, and an AI-integrated mail writing system.[\[Github\]](#)
- **University Food Delivery System (PHP, MySQL, HTML, CSS):** Built a full-stack food ordering platform for students, implementing backend logic, database management, and frontend interfaces[\[Github\]](#)
- **Auxi (Java, JavaFX):** Developed a desktop application for student and academic resource management[\[Github\]](#)

Achievements

- **Academic:** Summa Cum Laude (Expected).
- **Academic:** Received 7 scholarships with 100% tuition waivers, 3 with 50% waivers, and 1 with a 25% waiver.
- **Kaggle Machine Learning Competition:** Placed 3rd in an Intra-University Kaggle Machine Learning Competition.
- **LeetCode:** Solved 100+ coding problems.
